Subject: special session of CC group at 2016 Ramazzini Days

Dear all

As you know, the US TSCA reform bill was voted beginning of June, important discussions on TTIP are continuing, and other important progress (?) might be made with respect to chemical control.

To enhance the internal CR discussion and to assess the need of a more active role of the CR in the international discussion, I propose to have a special Chemical Control group session at the next Ramazinni days.

At our meeting in Carpi, 25 October 2015, the Chemical Control group identified 3 items in the field of chemical regulation and control that merit further exploration. (1) TTIP; (2) Use all available data; and (3) Comparative hazard assessment (see the report).

Please therefore see the first steps for a proposal and let me know what you think of it.

Please respond ASAP if you are interested to participate in the session.

We will have to act fast with abstracts, as in principle deadline is today. However, I will contact Melissa and ask for a little extra time.

Thanks

Ludwine

PS please use the mail address Ludwine C <**Personal Email / Ex. 6**> as my work address is not functioning (temporarily)

Proposal for a session at the Collegium Ramazzini Days 2016

Goals of the session:

- to enhance the internal discussion on nowadays chemical regulation
- to assess the need of a more active role of the CR in the international discussion

Planned presentations

- Introduction on chemical control (Grandjean - started this group)
- Evaluation of TSCA reform bill - shortcomings/improvements (Scott Faber, EWG - suggested by Phil)
- Use of available data in chemicals assessment (John Bucher, Linda Birnbaum - drafting team CC meeting 2015)
- TTIP - current discussions (Lynn Goldmann, Jen Sas - drafting team CC meeting 2015)
- Comparative Hazard Assessment (Vivyan Howard, David Gee - drafting team CC meeting 2015)

Time schedule: (90 minutes)

introduction 10 minutes

presentations 15 minutes

discussion 20 minutes
